analogy, 27, 255
autoepistemic logic of beliefs, 107
automated deduction, 215
automated reasoning, 167
automated theorem proving, 283
autoreduced set, 365

challenge problems, 255
characteristic set, 365
classical equivalential calculus, 283

description logic systems, 337
differential algebra, 365
differential dimension, 365
discrimination trees, 5
disjunctive semantics, 143

elimination theory, 365
equality reasoning, 47
extended resolution, 27

generalization, 27

implementation, 5
inconsistent information, 191
informational logic, 167
invertibility of a polynomial, 365

knowledge representation, 167, 191

logic programming, 107, 143
logical calculi, 285
loop elimination, 317

MACE, 283
model-based diagnosis, 81
model building, 27

negation, 107
nonmonotonic reasoning, 107, 143

OTTER, 283

paraconsistent reasoning, 191
parametric set, 365
probabilistic reasoning, 167
puzzle, 215

resolution, 317
rigid E-unification, 47

second-order terms, 27
self-resolving clauses, 317
semantics, 191
shortest single axioms, 283
strategy, 81
subgoal, 215
subsumption checking, 337

tableau method, 47
theorem proving, 337
transformation of clauses, 317

unification, 5
